WORK EXPERIENCE

	Senior IOS developer Rawalpindi, Pakistan (2021- Present) Projects Developed in: Swift, Swift-UI, Objective-C
---	--

Key Responsibilities:

- Developed most recent Companion app revamping to merge CareCloud Companion app to talklite serving both environment users and developed with speed to deliver it within 3 sprints. App have **adaptive layouts** to support iPhone and iPad devices.
- Developed Expense reporting ios app for company finance department to get employee's expense transactions for Amex Card, employees personal card and Mileage transactions. I developed this app as a sole IOS developer working closely with web service team members. App have **MapKit**, custom views to match 100% design given by designers, **remote notification handling** and **background fetches**.
- Developed Anesthesia IOS application as a sole IOS developer. App have challenging layout and custom views to show very complex interactive graphs like for operation monitoring to show the oxygen flow where each cell is growing along with horizontal axis and same values cells merged to one while others remain there. It's developed for the iPad and acts as a mini **iEHR app**.
- Worked on the existing app of the company with other team members to add features to talkCheckin for custom forms, Peads form, Sick visit flows updates, updated many screens and added new features.

- Developed many POC apps for the company to add features to existing apps for **BLE enabled** communication for **omron bp monitor** with ios synching data to the webservice. **Healthkit** integration with existing apps to fetch users health data.

	IOS developer Faisalabad, Pakistan (2018- 2021) Projects Developed in: Swift
---	---

Key Responsibilities:

- Developed company core app Invitation Maker which is a mini template editor to create invitation cards. It was a very challenging job to make algo for template psd to editable tree of views in swift. I worked on backend as well using node js to parse psd to db I used psd parser npm and handled that job. Used **AVFoundation** to mix audios and a lot of stuff to provider editor undo and redo.
- Developed mosque finder app from scratch to complete production for the company for the UK based audience. App have Agora io sdk integration for video calling. Living voice from mosque using **subject based notification** subscriptions in **firebase**. Local data storage for offline read support using **Realm**.
